THRIFT & STYLE

PRE-LOVED. RE-STYLED. RE-WORN.

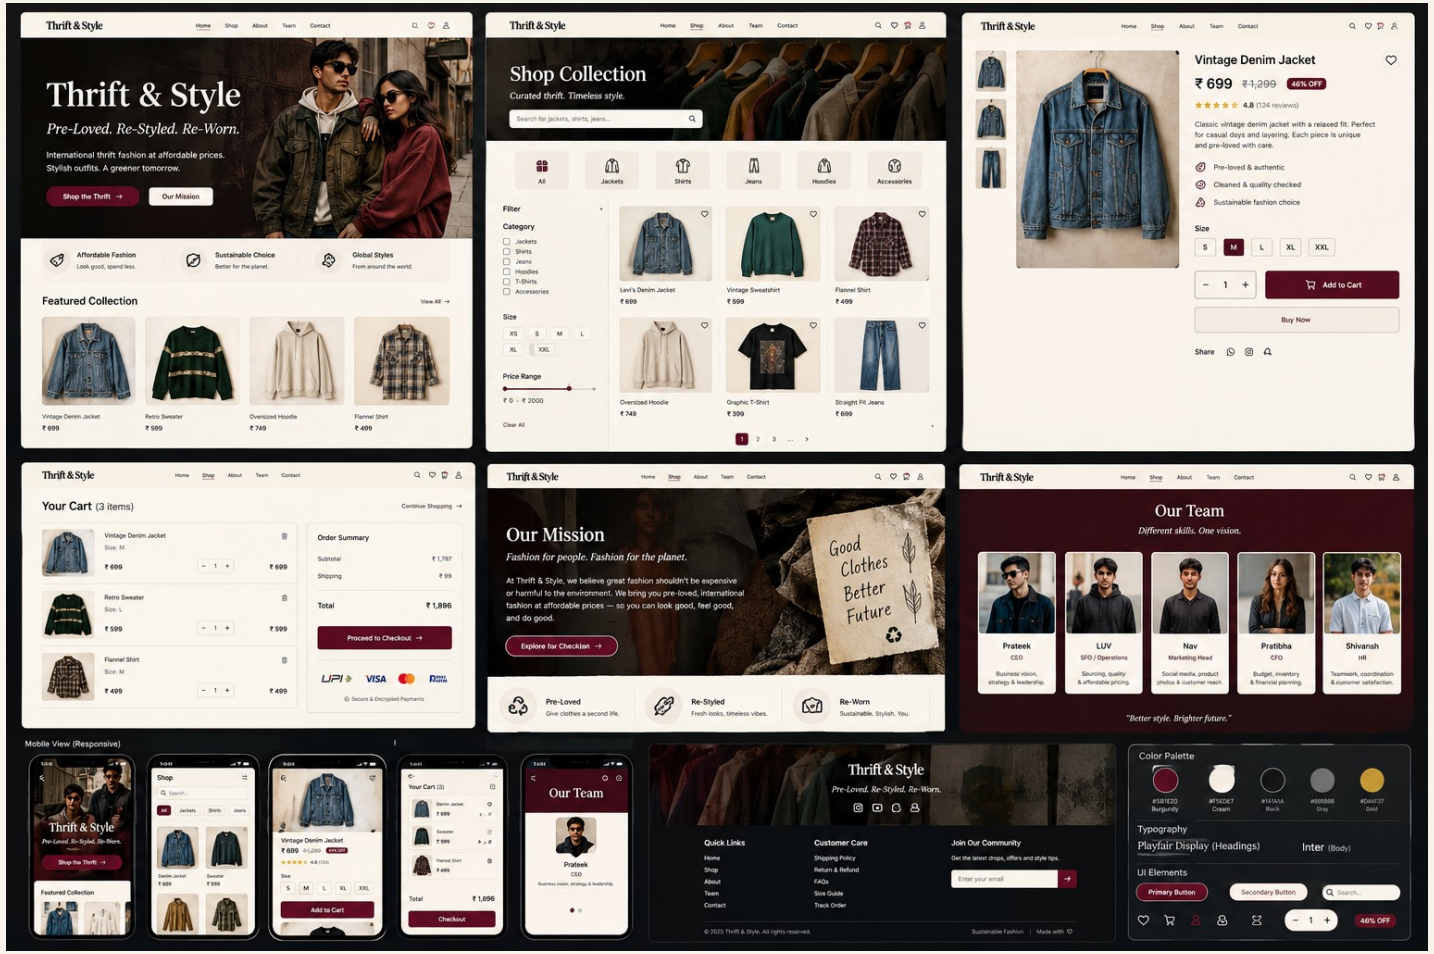

Website UI/UX Reference & AI Build Prompt

A screen-by-screen guide to recreate the reference design

Prepared for the Thrift & Style student startup pitch

The overall visual language

BRAND FEEL

Editorial • Vintage • Premium • Warm • Sustainable

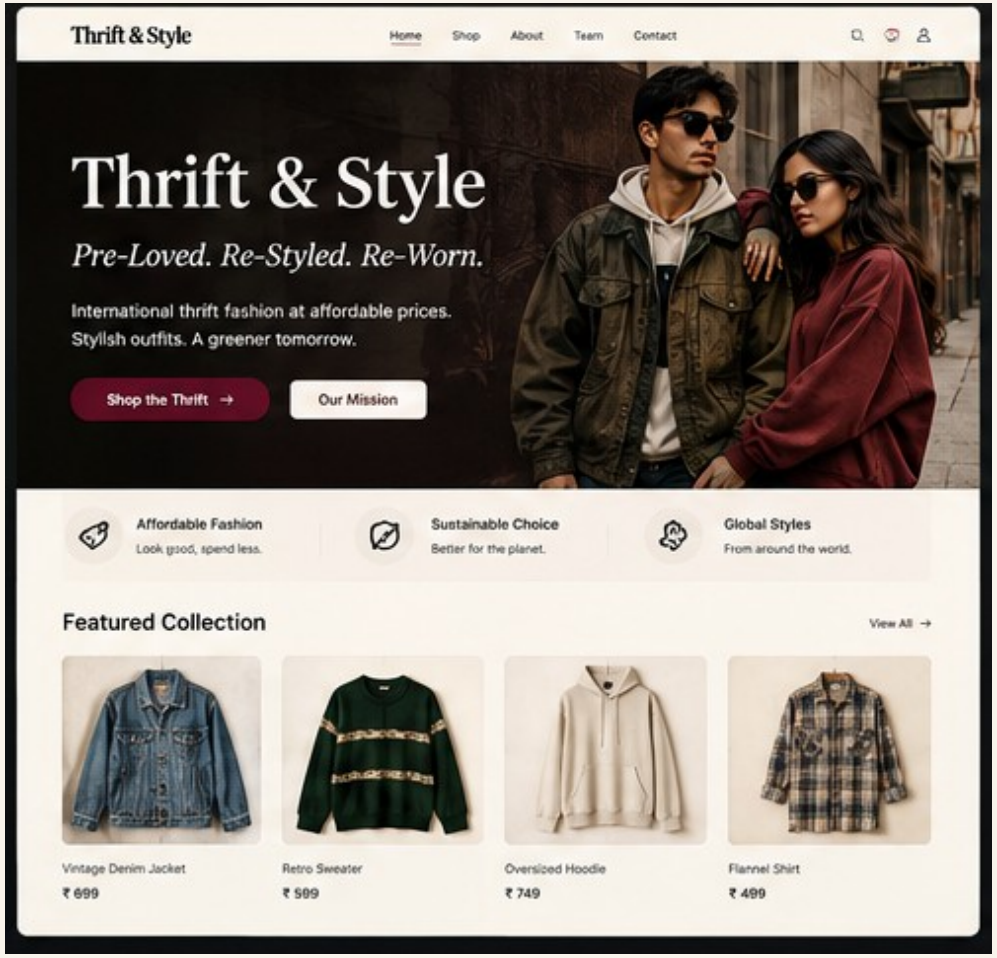

COLOR PALETTE

- Burgundy #75192F
- Cream #F8F3EB
- Near-black #201C1C
- Warm grey #A99B91
- Muted gold #D4A72C

TYPE

Playfair Display / Georgia for headings; Inter / Arial for body text.

Make the first screen feel like a fashion editorial.

WHAT THIS SECTION NEEDS

• Header: brand logo left; Home, Shop, About, Team and Contact links; search, wishlist, bag and account icons.

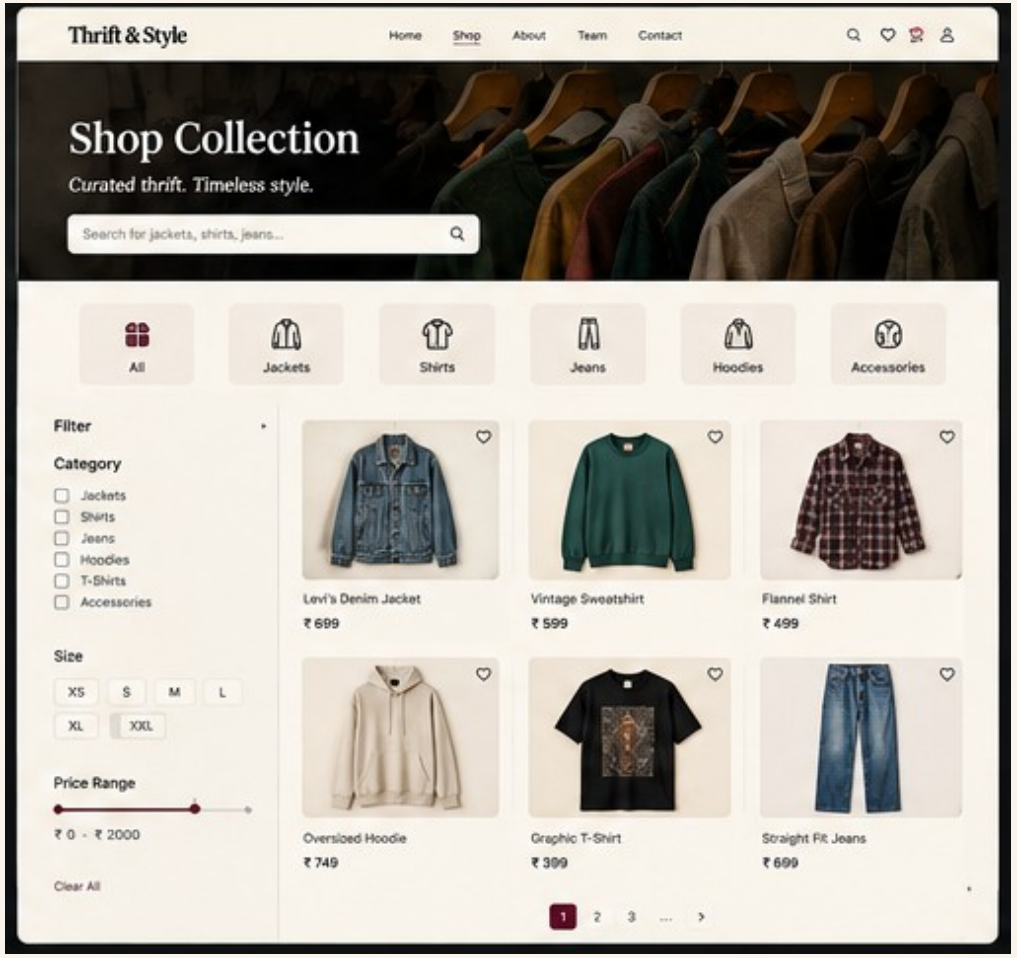

• Hero: large fashion photograph, oversized serif headline “Good style. Second story.” and tagline.

• Primary CTA: “Shop the Thrift”; secondary CTA: “Our Mission”.

• Trust strip: Affordable Fashion, Sustainable Choice, Global Styles.

• Featured collection: 4 product cards with image, name, price and View All link.

Help customers discover pieces quickly.

WHAT THIS SECTION NEEDS

• Shop banner with title, short subtitle and a search field.

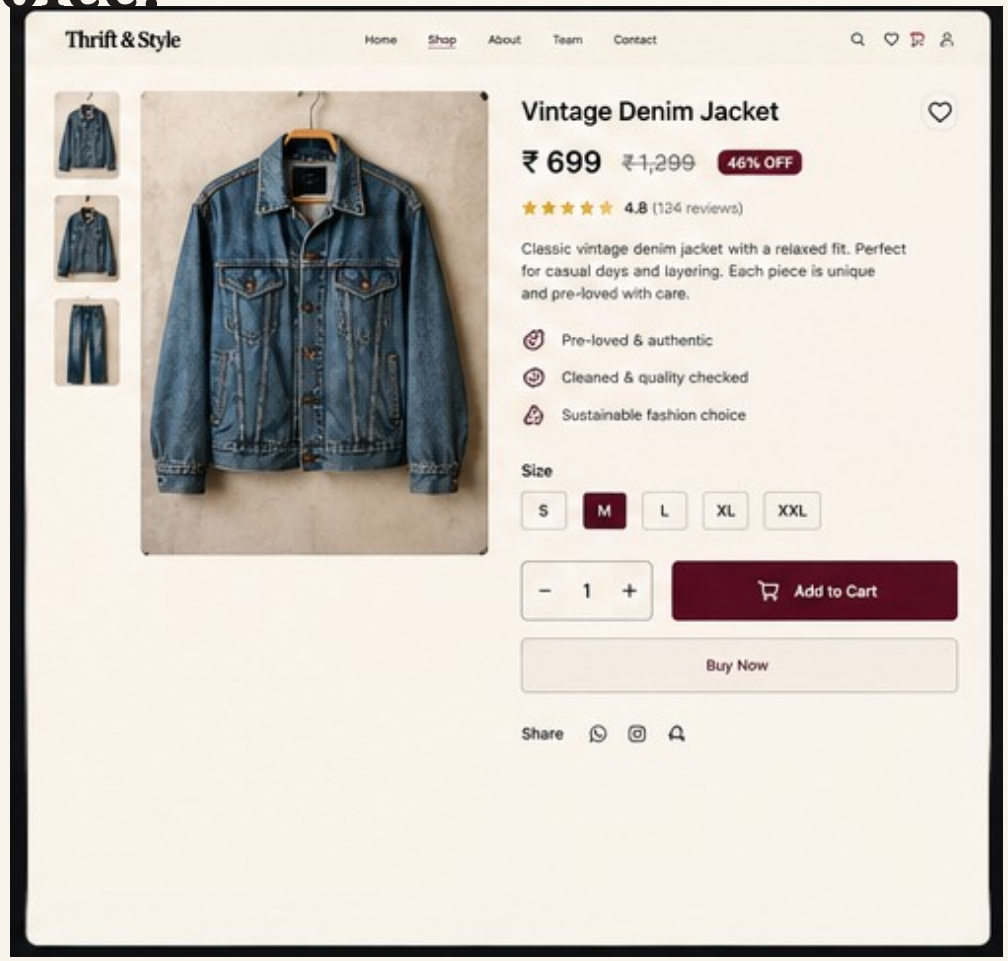

• Category tiles: All, Jackets, Shirts, Jeans, Hoodies and Accessories.

• Left filter rail: category checkboxes, size chips and price range slider.

• Product grid: consistent image ratio, condition/new-find badge, title, price and wishlist icon.

• Pagination or Load More at the bottom; filters must work, not just look decorative.

Give shoppers the information needed to make a confident choice.

WHAT THIS SECTION NEEDS

• Left: large product image with vertical thumbnails.

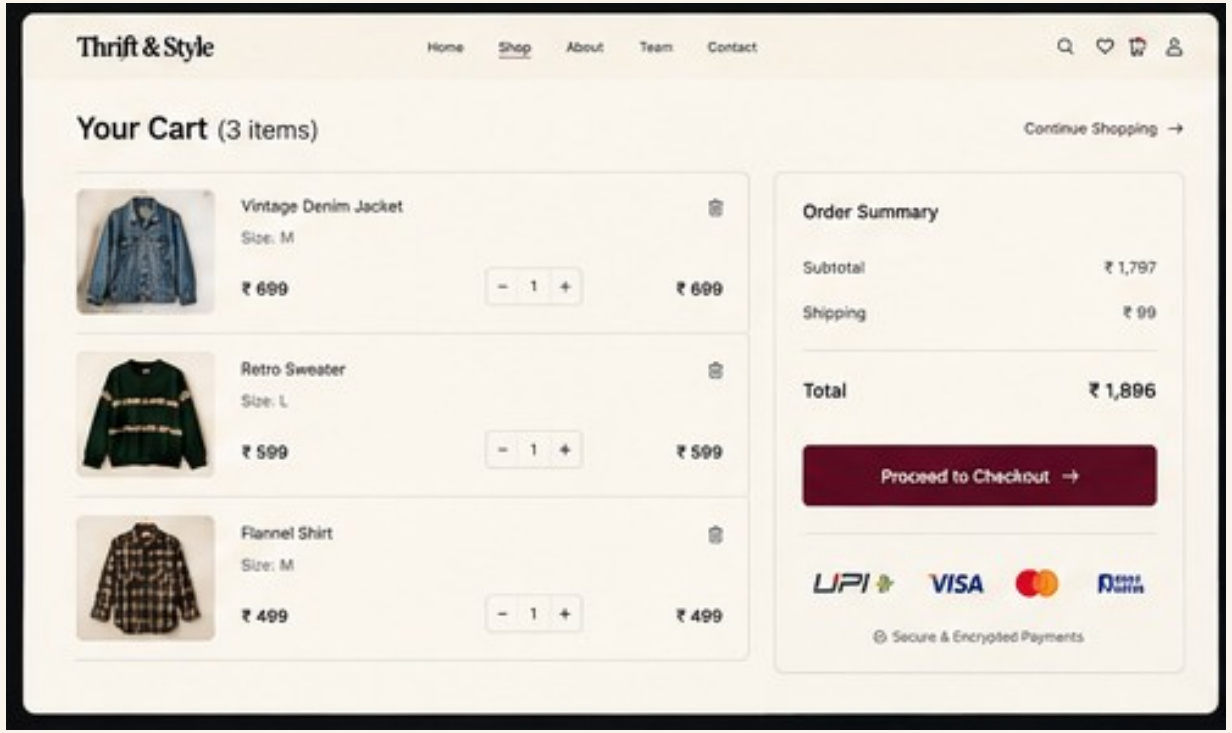

• Right: product name, price, optional crossed-out comparison price, discount badge and rating placeholder only if real reviews exist.

• Condition and trust notes: pre-loved & authentic, cleaned and quality checked, sustainable choice.

• Size selector, quantity stepper, Add to Cart and Buy Now buttons.

• Show condition honestly; include fit, measurements, flaws and care notes when available.

Keep checkout simple and transparent.

WHAT THIS SECTION NEEDS

• List each item with thumbnail, name, selected size, price and remove control.

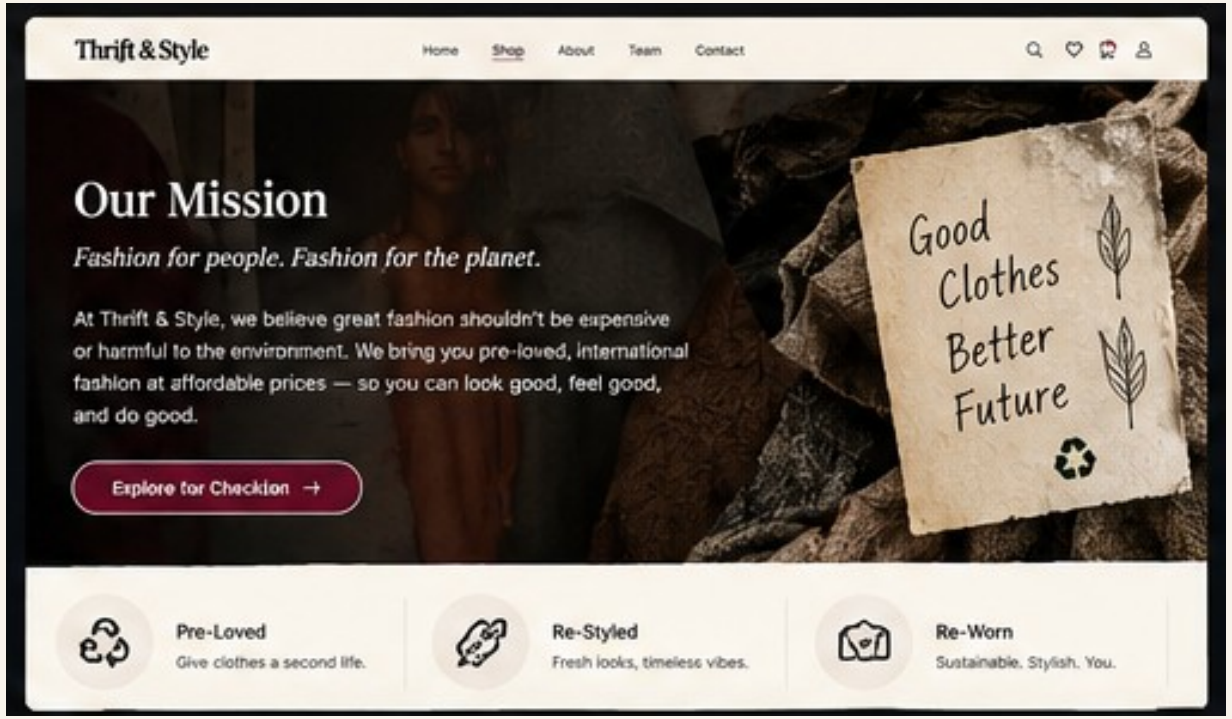

• Quantity stepper updates item count and subtotal.

• Order summary: subtotal, shipping and total.

• Primary CTA: Proceed to Checkout; secondary link: Continue Shopping.

• For a demo, use a clear mock checkout; do not imply real payment processing without a payment provider.

Explain why the brand exists, not just what it sells.

WHAT THIS SECTION NEEDS

• Editorial split layout: strong image or campaign panel on one side, story on the other.

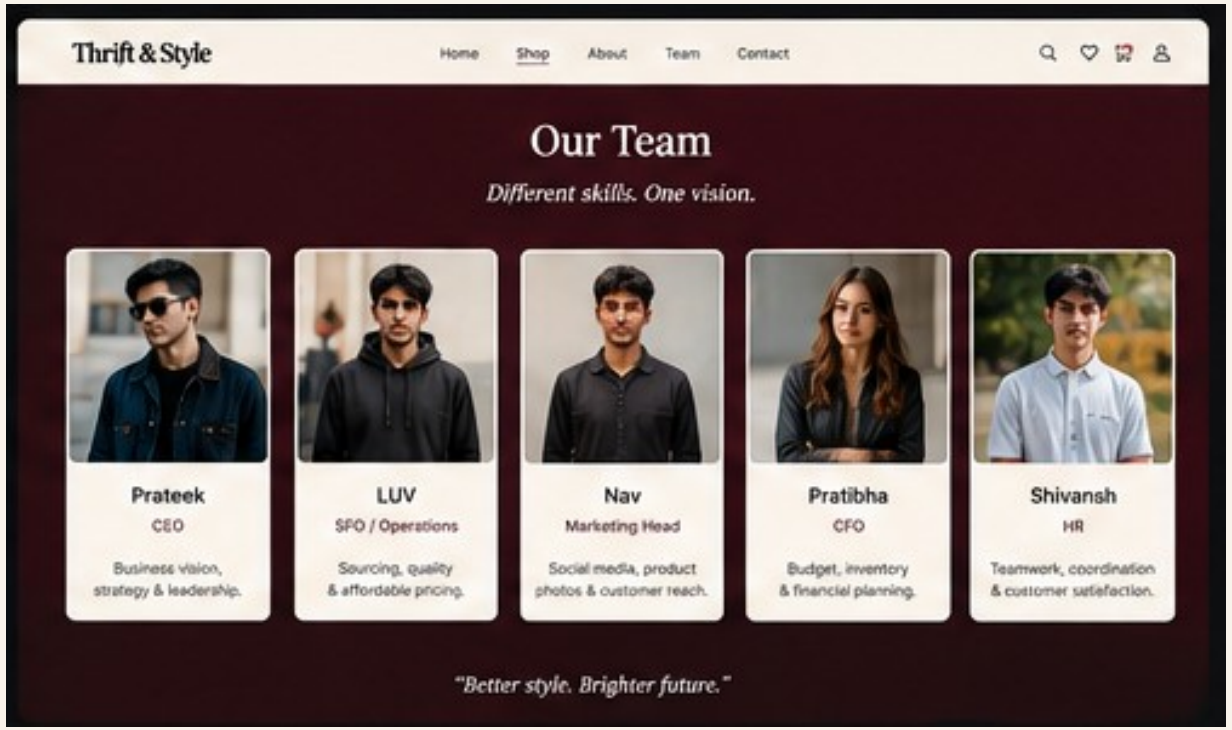

• Headline: “Fashion with a little more thought.”

• Explain the sourcing, inspection, cleaning, online listing and delivery process.

• Use careful wording: the brand aims to support reuse and more thoughtful fashion; avoid unsupported environmental statistics.

• Repeat the tagline and link to the collection.

Make every member’s role clear to the audience.

WHAT THIS SECTION NEEDS

• Use five consistent profile cards with image, name, role and one-line responsibility.

• Prateek — CEO: vision, strategy and overall direction.

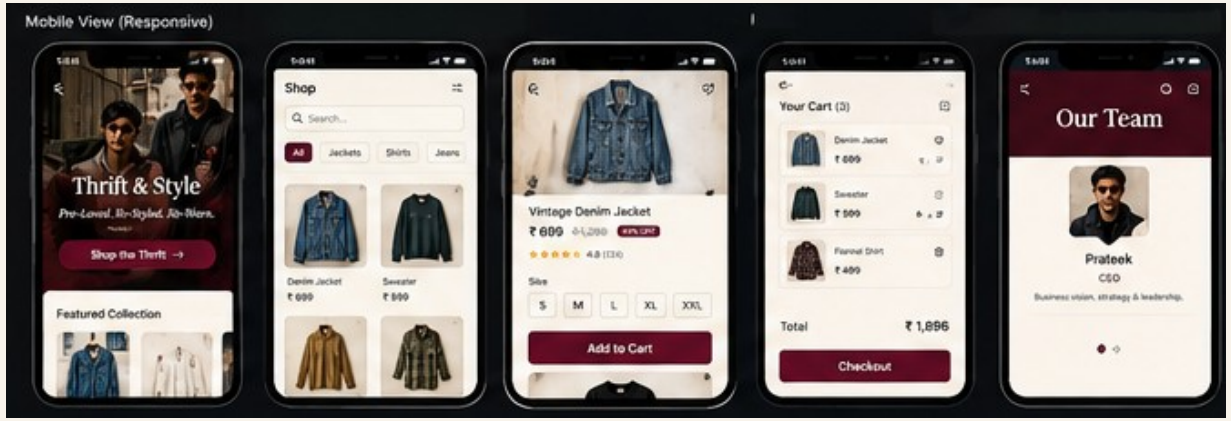

• Luv — Operations/Sourcing (confirm final title): sourcing and quality focus.

• Nav — Marketing Head: social content, photography and word of mouth.

• Pratibha — CFO: budget, cost tracking and pricing.

• Shivansh — HR: teamwork, coordination and customer satisfaction.

The same brand system should work on a phone.

WHAT THIS SECTION NEEDS

• Use a compact header and mobile navigation/menu.

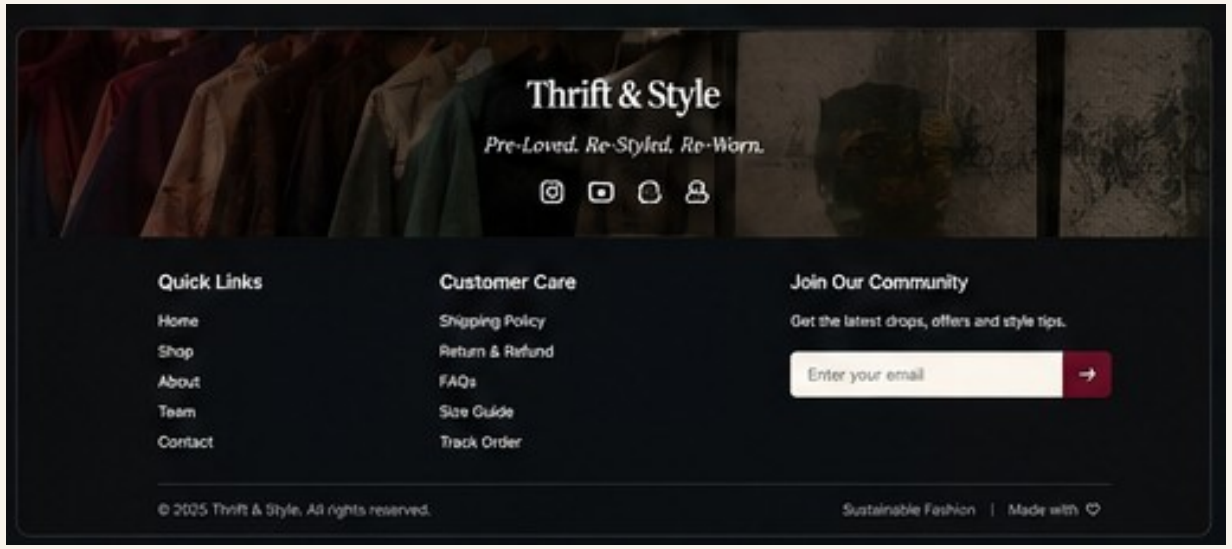

• Stack the hero image and text; keep the main CTA visible.

• Product grid becomes 2 columns on typical phones and 1 column on very narrow screens.

• Filters open in a drawer or collapsible panel.

• Cart controls and buttons must be touch-friendly; avoid horizontal overflow.

End every page with useful next steps.

WHAT THIS SECTION NEEDS

• Brand logo and tagline.

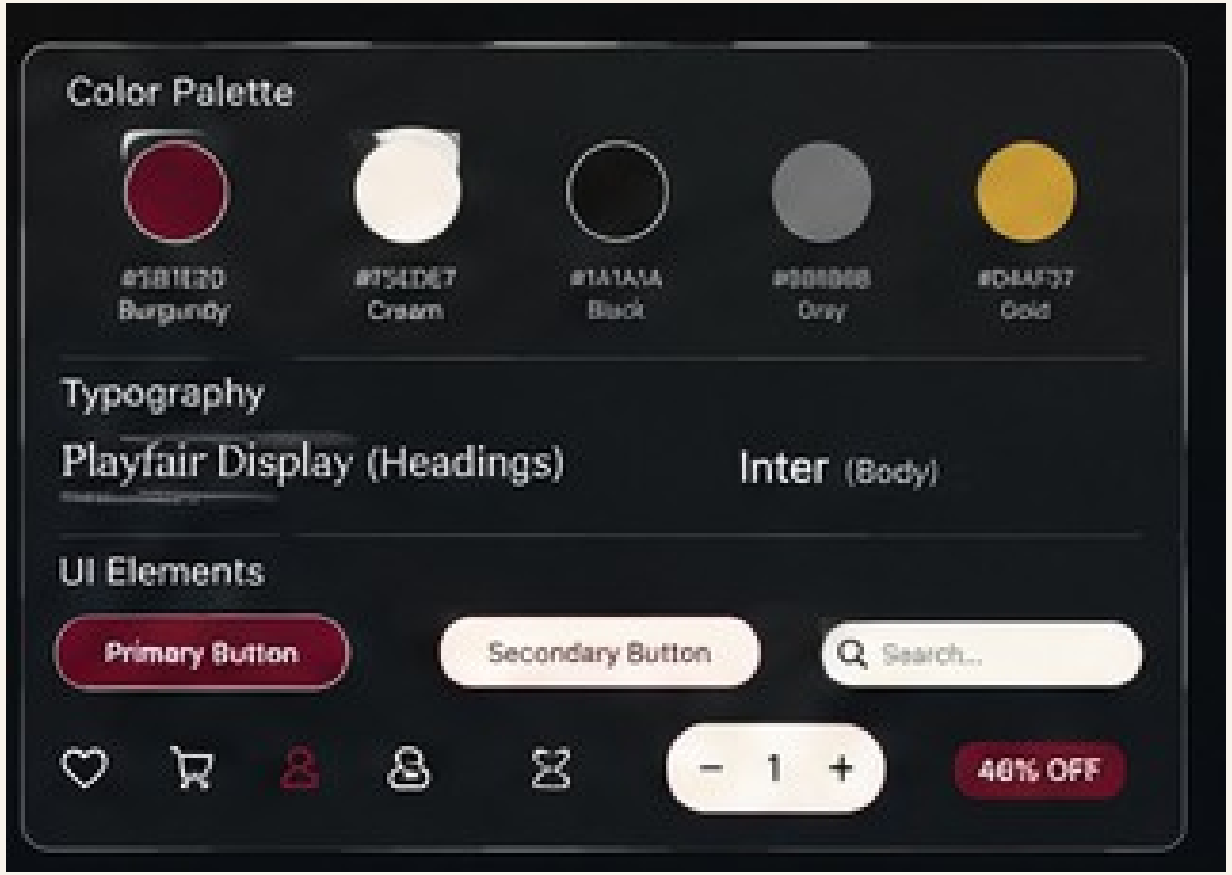

• Quick links: Home, Shop, About, Team, Contact.

• Customer care: Shipping Policy, Returns, FAQs, Size Guide and Track Order (only if supported).

• Newsletter signup with validation and success feedback; connect a real service only if configured.

• Social links should point to the brand’s actual profiles, not invented accounts.

Give the AI consistent reusable rules.

WHAT THIS SECTION NEEDS

• Colors: Burgundy #75192F, Cream #F8F3EB, Near-black #201C1C, Warm grey #A99B91, muted gold accent.

• Typography: Playfair Display / Georgia for editorial headings; Inter / Arial for readable body copy.

• Components: primary and secondary buttons, search field, product card, category tile, size chip, badge, quantity stepper and toast.

• Spacing: consistent 8-point rhythm, generous whitespace, subtle borders and restrained shadows.

• Use accessible contrast, visible focus states, alt text and keyboard-friendly controls.

BUILD CHECKLIST

Make it look right. Make it work right.

01 Use the supplied UI/UX reference image as the visual target; do not redesign the brand in a different style.

02 Build responsive pages/components for Home, Shop, Product Detail, Cart, Our Story, Team and Footer.

03 Create reusable product cards, filters, buttons, badges, navigation and quantity controls.

04 Use believable demo products and clearly mark sample content; never claim demo checkout is a real transaction.

05 Implement search, category/size filters, add-to-cart, cart count, quantity changes, remove item and subtotal calculations.

06 Use the same burgundy/cream/black palette, editorial typography, spacing and image treatment on every page.

07 Use genuine product photos or licensed placeholders; never pretend AI mock images are actual stock photos.

08 Before final delivery, check mobile, tablet and desktop layouts, accessibility, loading states and empty-cart states.

Financial figures shown in the concept: ₹20,000 starting capital; 40 items × ₹650 = ₹26,000 target sales; estimated ₹9,000 operating profit before other applicable expenses.
