THRIFT & STYLE — WEBSITE BUILD PROMPT
Tagline: “Pre-Loved. Re-Styled. Re-Worn.”

ROLE
You are a senior UI/UX designer and frontend engineer. Build a polished, responsive website for Thrift & Style, a student-led online thrift fashion startup. Use the supplied UI/UX reference image as the primary visual target. Match its overall composition, hierarchy, palette, typography, spacing, product-card style and editorial vintage-fashion mood as closely as possible. Do not invent a different brand direction.

BRAND AND VISUAL STYLE
- Premium editorial thrift fashion; warm, minimal, confident, vintage-inspired and approachable.
- Palette: Burgundy #75192F, Cream #F8F3EB, Near-black #201C1C, Warm grey #A99B91, muted gold #D4A72C used sparingly.
- Headings: Playfair Display or Georgia-style serif.
- Body: Inter or a clean sans-serif.
- Use generous whitespace, subtle borders, restrained shadows, strong fashion photography, tidy grids and consistent 8-point spacing.
- Buttons: burgundy primary with cream text; outlined cream/black secondary. Use consistent hover, focus, disabled and loading states.
- Use responsive design for desktop, tablet and mobile. Keep mobile layouts polished, not merely squeezed desktop layouts.
- Reuse the same header, footer, color tokens, typography and UI components across every page.

IMPORTANT REFERENCE IMAGE INSTRUCTIONS
Use the supplied reference image as a visual guide for each section:
1. Home page — large editorial hero image, “Thrift & Style” brand identity, tagline, Shop the Thrift and Our Mission buttons, trust strip and featured products.
2. Shop collection — wide shop banner, search bar, category tiles, left-side filters and multi-column product grid.
3. Product detail — thumbnail rail, large product image, product information, price, condition notes, size selector, quantity stepper and Add to Cart.
4. Shopping cart — clean item list, quantity controls, remove action, order summary and checkout CTA.
5. Our Story/Mission — split editorial campaign layout, mission copy, sourcing process and a link back to shopping.
6. Our Team — five consistent team profile cards.
7. Mobile — compact navigation, stacked hero, two-column product grid, usable cart and touch-friendly controls.
8. Footer — brand, quick links, customer-care links and newsletter signup.
9. Design system — consistent buttons, badges, search field, category tiles, product cards, chips, quantity controls and notification toast.

PAGE / SECTION REQUIREMENTS

A. HEADER
- Brand wordmark “THRIFT & STYLE”.
- Links: Home, Shop, About, Team, Contact.
- Search, wishlist, bag/cart and account icons if supported.
- Sticky header on desktop; compact mobile header with a menu.
- Cart badge updates when an item is added.

B. HOME / HERO
- Full-width editorial fashion image or split layout with large image.
- Headline: “Good style. Second story.”
- Supporting copy: “Discover pre-loved and vintage clothing selected for people who want personal style without the premium price tag.”
- Tagline: “Pre-Loved. Re-Styled. Re-Worn.”
- Primary button “Shop the Thrift”; secondary button “Our Mission”.
- Trust strip: “Affordable Fashion”, “Sustainable Choice”, “Global Styles”.

- Featured collection with four product cards and “View All”.

C. SHOP COLLECTION
- Title “Shop Collection” and subtitle “Curated thrift. Timeless style.”
- Search field with placeholder “Search for jackets, shirts, jeans…”.
- Category tiles: All, Jackets, Shirts, Jeans, Hoodies, Accessories.
- Filter sidebar or mobile drawer: category, size and price range.
- Product cards include image, product name, price, condition badge and wishlist control.
- Product examples: Vintage Denim Jacket ₹699; Retro Sweater ₹599; Oversized Hoodie ₹749; Flannel Shirt ₹499; Graphic T-Shirt ₹399; Straight Fit Jeans ₹699.
- These are demonstration products/prices; make them easy to edit.
- Filters and search must actually change the visible products.

D. PRODUCT DETAIL
- Gallery with main image and thumbnails.
- Example item: “Vintage Denim Jacket”, demo price ₹699.
- Show condition, description, size choices, quantity and clear Add to Cart / Buy Now actions.
- Trust notes: “Pre-loved & authentic”, “Cleaned & quality checked”, “Sustainable fashion choice”.
- Add realistic fields for measurements, condition grade, visible flaws and care information.
- Only display ratings/reviews if real data exists; otherwise label any rating as sample or omit it.
- Do not imply every pre-owned item is flawless; disclose defects accurately.

E. CART
- Item image, title, selected size, price, quantity control and remove action.
- Subtotal, shipping and total.
- “Continue Shopping” and “Proceed to Checkout”.
- Empty-cart state with a Shop button.
- Demo checkout must be clearly identified as a demo unless a legitimate payment provider is integrated. Never collect or store real payment details in a fake form.

F. OUR STORY / MISSION
- Headline: “Fashion with a little more thought.”
- Explain the business: source pre-owned/vintage clothes from wholesale markets; inspect and clean selected pieces; photograph and list products online; pack carefully and deliver through reliable shipping.
- Mission: make fashion stylish, affordable and more sustainable by helping wearable clothes find a new owner.
- Use a strong editorial image and repeat the brand tagline.
- Do not make unsupported environmental impact claims or invent sustainability statistics.

G. OUR TEAM
Create five cards with name, title and short responsibility:
- Prateek — CEO: business vision, strategy and overall leadership.
- Luv — Operations / Sourcing: sourcing quality thrift finds and supporting affordable pricing. NOTE: the original pitch labels Luv “SFO”; confirm the intended title before changing this role.
- Nav — Marketing Head: social media, product photography and word of mouth.
- Pratibha — CFO: budget, inventory costs, pricing and financial planning.
- Shivansh — HR: teamwork, coordination and customer satisfaction.
Use supplied team photos if available; otherwise use clearly replaceable placeholders, not fake claims that these are real photos.

H. BUSINESS PLAN / FINANCIAL SECTION
Present the proposed initial capital of ₹20,000:
- Stock / inventory: ₹12,000
- Packaging and shipping: ₹2,000
- Marketing and photography: ₹2,000

- Website tools: ₹1,000
- Emergency reserve: ₹3,000
Sales target: 40 items × ₹650 average selling price = ₹26,000.
Projected operating profit: approximately ₹9,000, calculated as ₹26,000 sales − ₹12,000 stock cost − ₹5,000 operating costs.
State clearly that this is a projection before other applicable expenses and assumes the target items sell. The emergency reserve is part of the initial capital allocation, not an operating expense in this calculation. Do not present projections as guaranteed results.

I. FOOTER
- Logo and tagline.
- Quick links: Home, Shop, About, Team, Contact.
- Customer care links: Shipping Policy, Returns & Refunds, FAQs, Size Guide, Track Order (only if implemented).
- Newsletter email field with validation and clear feedback.
- Social links only when real profile URLs are supplied.

FUNCTIONAL REQUIREMENTS
- Implement working navigation and section links.
- Search products by title.
- Filter by category, size and price.
- Add/remove items from cart; update cart badge, quantity, subtotal and total.
- Wishlist toggle should visually update.
- Newsletter validates input and displays confirmation; connect to a real service only if credentials/configuration are supplied.
- Use reusable components and centralized design tokens.
- Provide loading, error, no-results and empty-cart states.
- Use semantic HTML, keyboard accessibility, visible focus styles, image alt text and good color contrast.
- Optimize images, avoid unnecessary animation and respect reduced-motion preferences.
- Do not include broken links, fake payment processing, fabricated customer reviews or invented social accounts.

TECH STACK
Prefer React + TypeScript + Tailwind CSS if supported by the builder. Use clean reusable components. If the platform has a different native stack, use its best equivalent while preserving the design. Keep product data in a simple editable data file or array. If no backend is configured, use clearly labeled demo data and client-side cart state.

DELIVERABLE
Build the complete website, not just a landing page. Include all sections/pages listed above and make them visually consistent with the supplied reference image. Make every key control work. Ensure the first screen closely resembles the reference: cream navigation bar, burgundy accents, editorial fashion imagery, large serif heading, product cards and generous whitespace. At the end, briefly list implemented sections and any integrations that still need real credentials.
